

April 28, 1954

Dr. Murrell T. Morris, Chemist
Federal Agricultural Expt. Sta.
Mayaguez
PUERTO RICO

Dear Dr. Morris:

Thank you for your letter of April 7. At your suggestion I have written to the Hawaiian Experiment Station, but Dr. Rosenberg there (who originally came from this department) informs me that the indican feeding experiment has been discontinued and that they have no further supply of this material.

I would therefore continue to stand indebted to you for any help that you can give me in furnishing either the raw plant material or the extracted glucoside. As I do not regard myself as an accomplished chemist, I would be especially grateful for the latter, but do not wish to put you to any unwanted trouble.

Yours sincerely,

Joshua Lederberg,
Associate Professor of Genetics
